## HOME:

- So far we can get the date to update
- The buttons are disabled until data is inputted
- Theoretically the buttons should work

SUBMISSION:

- Examples are given for each TextField
- The Message (TextArea) has a limit of 140 characters (including spaces)
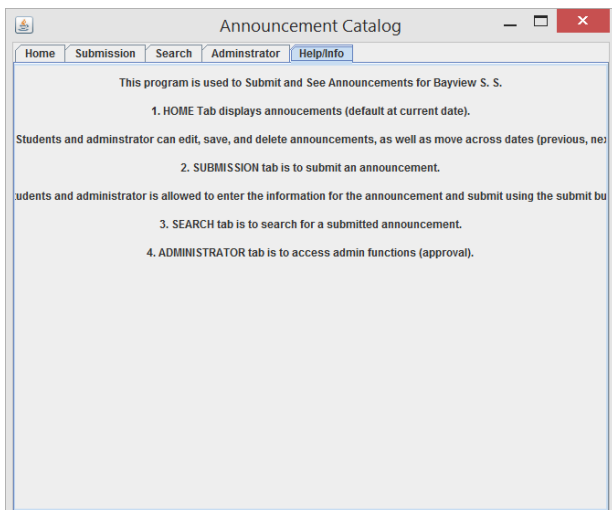

SEARCH:

- User searches for message(s) with the *exact* club name and date
- Search button disabled until there is data inputted
- Message Titled Border makes it neater when the message is displayed (JLabels)

ADMINSTRATOR:

- Save Changes button disabled until there is data inputted
- Table rows and columns should be shown (even w/o data) → a bug we will fix
- Check boxes will be used to approve announcements (deciding whether table should be editable)

HELP/INFO:

- We will make it fit on the screen

*** Subject to change (updates needed)

Announcement Approval

Save Changes

This program is used to Submit and See Announcements for Bayview S. S.

1. HOME Tab displays annoucements (default at current date).

Students and adminstrator can edit, save, and delete announcements, as well as move across dates (previous, nex
